## ERS Is Currently Seeking To Acquire Retired Assets In All Industrial & Energy Sectors

We help rebuild America's heavy industrial sites and infrastructure that this country has been built on.

ERS works with owners of environmentally challenged properties. We can reduce your financial exposure and future risk. Let us review your properties and sit down with you to see how we can assist you in improving your balance sheet liabilities.

## Letter From The President

ERS is pleased to announce a number of changes we are making within ERS Investments. These changes will focus on how we communicate with our customers and the public, as well as implement a major strategic platform that will create a seamless redevelopment process across much of Americas industrial infrastructure.

I am also announcing a new update to our website page. Please click to: [www.ersinvest.net](http://www.ersinvest.net). While viewing, please sign up for our informative industry newsletter. ERS Investors is proud to announce the launch of our Intermodal Transport Development Platform. This innovative platform is a first for the industrial real estate market as we are taking a unique approach towards the redevelopment of blighted and under-utilized transportation based industrial sites.

ERS plans to invest significant resources in the development of a robust portfolio containing once marquee properties that have gone dark and become blights along the transportation infrastructures on which the United States economy depends. ERS works closely with railroads, trucking, and shipping companies developing trans-load, terminal, and distribution operations. Through our immense efforts, ERS has successfully forged close relationships and strategic partnerships across the US and Canada allowing our unique vision to become a reality.
